

Clarification Question(s)	Customer Response
<p>We note and thank you for the responses to tender clarification requests, however the response to the extent of Detail A/B states that approximately 600m of Detail A is to be constructed. We assume this figure is incorrect and that it is nearer to approximately 300m that is required to be constructed ?</p>	<p>The previous query asked "Particularly the perimeter of Detail A" which we calculate to be 600m, and have made clear on the drawing. The "front face (lakeside)" length of Area A is approximately 300m. For Detail B there is a not a perimeter as such, so the "front face (lakeside)" length is 140m</p>
