Mitton beat rules

Further rules, advice, and etiquette

- To prevent clashes with other anglers on opposite bank please avoid casting into the casting area of an angler already fishing downstream.
- To prevent the disturbance of fish in pools try to remain below the skyline when approaching the river.
- If another angler is waiting to fish please do not repeat fish a pool without first fishing another pool or stretch. No wading beyond the central line of the river.
- There is a rod limit of 12 rods on this beat.
- No littering- please take all your litter home.
- No dogs are allowed on the Mitton Beat.

Health and Safety guidance

Uneven Ground- The area consists of uneven ground which may be slippery; please wear suitable footwear.

Deep and fast flowing water around structures- Bridges, boulders, weirs and other debris are present at these sites, this debris can increase the depth and flow speed of the river surrounding it.

Deep water- The river bed is uneven and consist of a mix of soft silt and rocky areas and the depth changes are rapid. Care should be taken when wading and where possible a wading staff should be used and life preserver worn.

Sudden change in water level and floating hazards- The rivers are susceptible to flooding. Please be aware water levels can change quickly and large objects can be carried downstream at anytime by the flow presenting a hazard to wading anglers.

Steep sides and undercut banks- Some river banks are steep or vertical and slippery. Before entering the river ensure you can exit quickly and safely if required. Banks are prone to being undercut by erosion which leaves an overhang that is liable to collapse.
